aviation
conference**

Southeast Europe General Aviation

ABOUT SEGA

SEGA international conference is an exclusive assembly of esteemed aviation enterprises concentrated on the general aviation sector.

The conference is focused on manufacturers and service providers from North America, Western, and Southeastern Europe.

Our objective is to create a platform where industry professionals, experts, and innovators can come together, exchange ideas, and establish meaningful partnerships that will drive the growth and development of the general aviation sector.

Hello, I am Captain Segić and I will be your host at SEGA 2024.

SEGA 2022

Representatives from regional companies seized the opportunity to network with international counterparts, fostering collaboration to drive the growth of general aviation in the region.

A key highlight was the series of B2B meetings, where companies explored potential partnerships. Handshakes evolved into agreements, and business cards exchanged during the conference now symbolize promising collaborative projects.

SEGA PIONEERS

the **1st** regional
conference dedicated to
General Aviation.
